

# ADRIAN ALBERT CIUBUCCIU

## PROFESSIONAL SUMMARY

Knowledgeable developer with proven success designing web pages that enhance functionality, branding and navigation. Delivers both front- and back-end development across mobile and web applications. Experienced in establishing thorough front end frameworks to guarantee high-quality UI.

## WORK HISTORY

### Salesforce Developer, 08/2022 to Current

#### Deloitte - Bucharest

- Contributed significantly to successful completion of a one-year-old Sandvik Group project, specializing in mining and rock solutions.
- Developed and optimized a tailored Salesforce org, incorporating automation tools such as flows and process builders.
- Utilized Custom Metadata Types and demonstrated expertise in ServiceMax Asset360 Cloud and Field Service Cloud .
- Implemented mobile-friendly automations, enhancing field service operations and improving allocation of technicians for product maintenance.
- The project's successful completion was highlighted by the client's satisfaction, evident in their choice to organize a celebratory event in Copenhagen. They generously sponsored our team's attendance, offering a gracious acknowledgment of the team's dedication and the triumphant conclusion of the project.
- Worked on development and implementation of a Salesforce org for Liechtensteinische Landesbank, focusing on managing financial services products and customer relationships. Joined the LLB Group project post-design phase, buildomg a private sharing model, custom objects, data layer, functionalities, and automations from inception.
- Learned and used Financial Service Cloud, utilized LWC for visually appealing customizations, and applied an internal Apex Framework for automation.
- Demonstrated expertise in crafting tailored solutions for banking domain, showcasing comprehensive skills in Salesforce customization and platform development.
- During a brief interlude between projects, actively contributed to an internal initiative involving the collaborative development of a CMS using React . Worked alongside a team of Front End and Back End Developers to successfully build and enhance the CMS, showcasing versatility and teamwork in diverse technical environments.

### Full Stack Developer, 04/2022 to 08/2022

#### Newroco - Iasi

- Tasked with building an application from scratch for Oxford

- DevOps ( GitLab, AZURE CI/CD Pipelines, Bitbucket, Jira & Confluence, Jenkins )
- HTML5, CSS3, Bootstrap, LESS, SASS, TailwindCSS
- PHP, Magento 1/2, Laravel
- JavaScript, Typescript, React, Redux, NextJS, VueJS, Angular, NodeJS, ExpressJS
- SQL, PostgreSQL, PL/SQL
- Apex LWC
- Java, JavaFx, C++, C#, .NET,
- Python, Django

Archaeology, I ensured that its functionality corresponded to various user access levels. The application served as a comprehensive platform for managing data related to archaeological sites, providing insights into sites that were either reviewed or pending examination.

- Used PHP for backend development to manipulate database data and VueJS for frontend development to tailor an awesome UI that enhance the overall user experience.
- Key features of the application included a dynamic table presentation of data, offering efficient sorting capabilities based on columns. Users could seamlessly conduct live searches, enhancing the accessibility of specific information.
- To further enhance user experience and workflow efficiency, the application allowed the creation of custom groups of archaeological sites, which could be conveniently pinned to a sidebar for quick reference.
- This project showcased my ability to architect and implement a user-friendly frontend solution that addressed specific user access requirements, while also incorporating advanced functionalities for data manipulation and organization.

### **Full Stack Developer , 03/2021 to 04/2022**

#### **Cloudlab - Iasi**

- Implemented advanced e-commerce solutions, specializing in Magento 1 , Magento 2 , and Mautic initially. As a key member of a dynamic team, I actively contributed to developing custom modules, enhancing functionalities, and customizing themes for company's primary product aimed at automating order processing and enabling streamlined print sales online.
- Played an important role in the evolution of the company's product (PrintQ), transitioning from Magento 1 to Magento 2 with jQuery and vanilla JavaScript , and later incorporating VueJS for frontend development. The latest iterations involved the introduction of Laravel as a datacenter, showcasing my adaptability and proficiency across a spectrum of technologies.
- Collaborated with clients in the printing industry, contributing to the continuous improvement and customization of company's solutions for diverse client needs.

### **Web Developer, 09/2020 to 03/2021**

#### **Interacting Minds Ventures - Iasi**

Delivered customized digital solutions and marketing services, such as:

- Search Engine Optimization ( SEO ) : including analyses, keyword research and strategy, Wordpress plugin integrations, etc.
- Content Marketing
- Social Media Advertising : Google AdWords, Facebook Campaigns, and others
- Web Development : I created custom templates, designs and websites shaped on the clients needs and desire. I created blogs regarding financial industry, with topics such as cryptocurrency, forex, bank products and global economy.
- Email Marketing, PR and Native Leads.

### **Assistant Manager, 06/2019 to 03/2021**

#### **Clearsky Network - Iasi**

- In the first 2 months of activity I learned international law and provided consultancy for clients who wanted to establish companies under different jurisdictions
- Handled PSPs and EMIs account openings.
- After the first period I developed an internal web application for task management in HTML, CSS, Bootstrap, JavaScript, Ajax, jQuery, and PHP.
- Created websites and customized themes in Wordpress.

### **Helpdesk Agent, 04/2018 to 06/2019**

#### **GFK - Iasi**

- Improved communication and teamwork skills.
  - Wrote formal emails, did outbound calls and took inbound calls to solve technical problems of customers but also investigate why customers didn't receive incentives or could not connect to company's surveys application.
  - Learned how to use Microsoft Azure CRM according to the procedures, document each call with cases and assign them accordingly to the next step.
  - Worked efficiently under pressure and improved multitasking skills.
- 

## **EDUCATION**

### **A-Levels, Web Development, 2020 to 2021**

#### **Software Development Academy - Bucharest**

- Learned advanced HTML, CSS and JavaScript but also Bootstrap , LESS and SASS .
- Learned version control with Git .
- Learned responsive design.
- Learned the best practices and guidelines in Web Deveopment.
- Learned the framework Angular .
- Developed a sophisticated budget management application as a final project, customizing a Material Dashboard Theme template for a polished and professional appearance.
- Implemented the json-server package for backend simulation, providing a seamless user experience for expense and income tracking.
- Introduced a dynamic data table with live search, pagination, and customisable transaction categories, enhancing usability and organization.
- Designed an intuitive pop-up interface for updating or viewing transaction details, accessible with a simple button press within the transaction row.
- Integrated real-time updates at the dashboard's top, displaying monthly expenses, incomes, and transaction counts for enhanced financial awareness.
- Took the final exam on the knowledge gained during the course and presented the final project to an evaluation committee.

### **Bachelor of Science, Informatics Economics, 2016 to 2019**

#### **Faculty of Economics And Business Administration - Iasi**

- Learned the basics of web development and databases management.
  - Throughout my university studies I made small projects in Wordpress, HTML, CSS, JavaScript, PostgreSQL, C#, Java and Spring, with a focus on economic applications such as development of accounting application, inventory management systems for retail stores, and applications catering to various financial services.
-
